Corrosion inhibiting admixtures.....	2
Anti-freezing admixtures.....	2
Admixtures for lightweight concrete.....	2
Admixtures for reducing alkali-silica reactivity.....	2
Fibers.....	2
Silica fume.....	2
Blended cements.....	2
Surface retarders.....	3
Formwork demolding release agents.....	3
Curing compounds.....	3

## MORTAR, GROUT & SHOTCRETE ADMIXTURES .....3

High-range water reducers.....	3
Mid-range water reducers.....	3
Water reducers.....	3
Air entrainers.....	3
Set retarders.....	3
Set accelerators.....	3
Integral water-repellents.....	4
Pumping aid.....	4
Viscosity-modifying admixtures.....	4
Expansion admixtures.....	4
Shrinkage reducing admixtures.....	4
Corrosion inhibiting admixtures.....	4
Antifreeze admixtures.....	4
Pigments and colorants.....	4
Anti-efflorescence additives.....	4
Curing compound.....	4
Fibers.....	4
Pozzolanic additives.....	4

## MASONRY BINDERS, MORTARS, & GROUTS.....4

Masonry binders.....	4
Masonry mortars – Dry Mix.....	4
Masonry mortars – Wet Mix.....	5
Non-shrink mortars & grouts.....	5
Thixotropic mortars for repair.....	5
Accelerated setting mortars.....	5
Shotcrete mortars with fine aggregates.....	5
Floor screeds.....	5
Resurfacing mortars.....	5
Epoxy mortars.....	5
Dry shakes and floor hardeners.....	5

## SPECIALTY CONCRETE PRODUCTS.....5

High strength concrete.....	5
Self-consolidating concrete.....	5
Accelerated setting concrete.....	5
Shotcrete products with coarse & fine aggregates.....	5
Pervious concrete.....	6
Lightweight concrete.....	6
Architectural concrete.....	6
Additives for stamped concrete.....	6

## ADHESIVES AND TILE GROUTS.....6

Cementitious tile adhesives.....	6
----------------------------------	---

Reaction resin tile adhesives.....	6
Epoxy and acrylate-based adhesives.....	7
Latex-based adhesives.....	7
Cementitious tile grouts.....	7
Reaction resin tile grouts.....	7

## WATERPROOFING & SEALING PRODUCTS .....7

Waterproofing by crystallization slurries.....	7
Cementitious-based waterproofers.....	7
Polyurethane sealants.....	7
Polysulphide sealants.....	7
Surface hardeners.....	7
Water-repellents.....	7
Surface penetrants.....	7
Insulations & tapes.....	7

## CONCRETE ADMIXTURES

### High-range water reducers

#### Batimix HWR / HWR-S / HWR-A Series <sup>1</sup>

Superplasticizers for concrete

<sup>1</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

### Mid-range water reducers

#### Batimix MWR / MWR-S / MWR-A Series <sup>2</sup>

Mid-range plasticizers for concrete

<sup>2</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

### Water reducers

#### Batimix WR / WR-S / WR-A Series <sup>3</sup>

Plasticizers for concrete

<sup>3</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

### Air entrainers

#### Batimix AEA-110

Air entraining agent for concrete

#### Batimix AEA-120

Concentrated air entraining agent for concrete

### Set retarders

#### Batimix Retarder 210

Set-retarding admixture for concrete

#### Batimix Retarder 220

Set-retarding and plasticizing admixture for concrete

#### Batimix Retarder 230

Set-retarding, plasticizing, and slump retention admixture for concrete

### Set accelerators

#### Batimix Accelerator 310

Chloride based, set-accelerating admixture

#### Batimix Accelerator 320

Chloride free, set-accelerating admixture

#### Batimix Accelerator 330

Chloride free, set-accelerating and plasticizing admixture

#### Batimix Accelerator 340

Chloride free, set-accelerating admixture for shotcrete

### Integral water-repellents

#### Batimix IWR 410

Liquid, integral water-repellent for concrete

#### Batimix IWR 420-S

Liquid, integral water-repellent with plasticizing effect

### Viscosity-modifying admixtures

#### Batimix VMA 510

Viscosity modifier for highly flowable concrete

#### Batimix VMA 520-S

Viscosity modifier with plasticizing effect for highly flowable concrete

#### Batimix VMA 530

Liquid admixture for improved homogeneity for pumped concrete

### Anti-washout admixtures

#### Batimix AWA 540

Anti-washout admixture for underwater concrete

### Shrinkage reducing admixtures

#### Batimix Anti-Shrink 610

Shrinkage reducing admixture for concrete

### Corrosion inhibiting admixtures

#### Batimix Anti-Corrosion 620

Corrosion inhibiting admixture for concrete

### Anti-freezing admixtures

#### Batimix Anti-Frost 630

Cold weather antifreeze admixture for concrete

### Admixtures for lightweight concrete

#### Batimix Cell 640

Powder admixture for lightweight concrete

### Admixtures for reducing alkali-silica reactivity

#### Batimix Alkali-Silica 650

Admixture to reduce alkali-silica reactivity in concrete

### Fibers

#### Batimix Fiber 660

Polypropylene fiber reinforcement for concrete

### Silica fume

#### Batimix Silica Fume 710

Powder microsilica for high performance concrete

### Blended cements

#### Batimix Blend Cement 720

Ready-to-use high strength binder for concrete

## Surface retarders

---

### Batimix Surface Retarder 730

Liquid surface retarder for concrete

## Formwork demolding release agents

---

### Batimix Form Release 740

Mold release agent

### Batimix Form Release 741

Emulsified mold release agent for fair-faced concrete

## Curing compounds

---

### Batimix Cure 750

Water-based curing compound

## MORTAR, GROUT & SHOTCRETE ADMIXTURES

### High-range water reducers

---

#### Batimix MSP / MSP-S / MSP-A Series <sup>1</sup>

Superplasticizers for mortars & grouts

<sup>1</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

#### Batimix HWR WG7-V1

High-range water reducing and flow enhancing admixture for shotcrete

### Mid-range water reducers

---

#### Batimix MP 200 / MP 200-S / MP 200-A Series <sup>2</sup>

Mid-range plasticizers for mortars & grouts

<sup>2</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

### Water reducers

---

#### Batimix MP 100 / MP 100-S / MP 100-A Series <sup>3</sup>

Plasticizers for mortars & grouts

#### Batimix HWR WG7-L

Wet mix shotcrete, liquid, water reducing admixture

#### Batimix HWR WG7-P

Wet mix shotcrete, powder, water reducing admixture

<sup>3</sup> Series with suffix S refer to products with set-retarding effect designed to meet hot weather conditions, and with suffix A to products with set-accelerating effect designed to meet cold weather conditions.

### Air entrainers

---

#### Batimix MAE 500

Air entraining admixture for mortars & grouts

#### Batimix Air WG8-L

Wet mix shotcrete, liquid, air entraining admixture

#### Batimix Air WG8-P

Wet mix shotcrete, powder, air entraining admixture

### Set retarders

---

#### Batimix MR 600

Set-retarding admixture for mortars & grouts

#### Batimix MR 630

Set-retarding and plasticizing admixture for mortars & grouts

#### Batimix MR 660

Hydration control set-regulating admixture for extended life mortars

#### Batimix Ret DG2-L

Dry mix shotcrete, liquid, set-retarding admixture

#### Batimix Ret DG2-P

Dry mix shotcrete, powder, set-retarding admixture

#### Batimix Ret WG2-L

Wet mix shotcrete, liquid, set-retarding admixture

#### Batimix Ret WG2-P

Wet mix shotcrete, powder, set-retarding admixture

### Set accelerators

---

#### Batimix MAC 700

Chloride based, set-accelerating admixture

#### Batimix MAC 730

Chloride-free, set-accelerating admixture

#### Batimix MAC 760

Chloride-free, set-accelerating and water reducing admixture

#### Batimix Accelerator 320

Chloride-free, set-accelerating liquid admixture designed for concrete masonry products

#### Batimix Acc DG1-L

Liquid dry mix shotcrete accelerating admixture

#### Batimix Acc DG1-P

Powder dry mix shotcrete accelerating admixture

#### Batimix Acc WG1-L

Wet mix shotcrete, liquid, accelerating admixture

#### Batimix Acc WG1-P

Wet mix shotcrete, powder, accelerating admixture

#### Batimix Acc DG9-L

Dry mix shotcrete, liquid, accelerating admixture - quick setting

#### Batimix Acc DG9-P

Dry mix shotcrete, powder, and accelerating admixture - quick setting

#### Batimix Acc WG9-L

Wet mix shotcrete, liquid, accelerating admixture - quick setting

**Batimix Acc WG 9-P**

Wet mix shotcrete, powder, accelerating admixture - quick setting

**Integral water-repellents****Batimix IWR 414**

Internal moisture barrier for concrete masonry products

**Batimix IWR 416**

Powder water-repellent for concrete, mortars & grouts

**Batimix IWR 421**

Liquid water-repellent for concrete, mortars & grouts

**Batimix IWR M-800**

Integral water-repellent for mortars & grouts

**Pumping aid****Batimix WG7-V2**

Pumping aid, specially formulated for mortars & grouts

**Viscosity-modifying admixtures****Batimix Thixo M-810**

Viscosity modifier for improved thixotropy and homogeneity

**Expansion admixtures****Batimix Expansion M-820**

Expansive admixture for controlled volume changes

**Shrinkage reducing admixtures****Batimix Anti-Shrink M-830**

Shrinkage reducing admixture for reduced cracks

**Corrosion inhibiting admixtures****Batimix Anti-Corrosion M-840**

Liquid admixture for better protection against steel corrosion

**Antifreeze admixtures****Batimix Anti-Frost M-850**

Cold weather antifreeze admixture

**Pigments and colorants****Batimix Color M-860**

Pigments in various colors, for integrally colored concrete, mortars, and grouts

**Anti-efflorescence additives****Batimix Anti-Efflorescence M-870**

Liquid admixture for reduced efflorescence of applied mortars & grouts

**Batimix CWR M-910**

Water-repellent coating for concrete masonry products

**Curing compound****Batimix Cure M-930**

Paraffin-wax liquid curing agent

**Batimix Cure M-935**

Acrylic curing and sealing compound

**Fibers****Batimix Fiber M-700**

Steel fibers

**Batimix Fiber M-710**

Alkali resistant glass fibers

**Batimix Fiber M-880**

Polypropylene synthetic fibers

**Pozzolanic additives****Batimix Fly Ash DG3-P**

Fly ash additive meeting the requirements of ASTM C618

**Batimix Slag DG3-P**

Ground glass blast furnace slag (GGBFS) meeting the requirements of ASTM C989

**MASONRY BINDERS, MORTARS, & GROUTS****Masonry binders****Batimix Masonry Binder 10 / 20 <sup>4</sup>**

Masonry binder for the assemblage of masonry units

**Batimix Masonry Binder 30 <sup>4</sup>**

Masonry binder for key coat applications

**Batimix Masonry Binder 40 <sup>4</sup>**

Masonry binder for plastering applications  
<sup>4</sup> Products are available in Grey or White colors.

**Masonry mortars – Dry Mix****Batimix Bloc Fix 220 / 230 <sup>5</sup>**

Ready-to-use mortars for the assemblage of masonry units

**Batimix Key Coat 240 / 250 <sup>5</sup>**

Ready-to-use mixed spatter-dash slurry coats

**Batimix Plaster 260 / 270 <sup>5</sup>**

Cementitious ready-to-use plasters

**Batimix Fiber Plaster 280 / 290 <sup>5</sup>**

Cementitious plasters with synthetic fibers

**Batimix Plaster W-330 <sup>5</sup>**

Hydrophobic mortars for plastering works

**Batimix Monocouche 300 <sup>6</sup>**

One-coat architectural rendering mortar  
<sup>5</sup> Products are available in Grey or White colors.  
<sup>6</sup> Products are available in different colors.

## Masonry mortars – Wet Mix

---

**Batimix Mortar EL-70**  
Extended life mortars

## Non-shrink mortars & grouts

---

**Batimix Mortar 600**  
Non-shrink grout for filling joints less than 4 mm

**Batimix Mortar 601**  
Non-shrink mortar for filling joints ranging from 4 to 10 mm

**Batimix Mortar 602**  
Non-shrink mortar for filling joints larger than 10 mm

## Thixotropic mortars for repair

---

**Batimix Mortar 620**  
Thixotropic fiber reinforced mortar for repair

**Batimix Mortar 621**  
Thixotropic mortar for repair

## Accelerated setting mortars

---

**Batimix Mortar 640**  
Accelerated setting mortar for repair – Grade R1

**Batimix Mortar 641**  
Accelerated setting mortar for repair – Grade R2

**Batimix Mortar 642**  
Ultra-accelerated setting mortar for repair – Grade R3

## Shotcrete mortars with fine aggregates

---

**Batimix Mortar 660**  
Shotcrete mortar for dry process applications – General use

**Batimix Mortar 661**  
Shotcrete mortar for dry process applications – Sulphate-resistant

**Batimix Mortar 662**  
Shotcrete mortar for dry process applications – Lower permeability

**Batimix Mortar 663**  
Fiber reinforced shotcrete mortar for dry process applications – Reduced shrinkage

**Batimix Mortar 664**  
Fiber shotcrete mortar for dry process applications – Minimized level of post-cracking

**Batimix Mortar 680**  
Shotcrete mortar for wet process applications – General use

**Batimix Mortar 681**  
Shotcrete mortar for wet process applications – Sulphate-resistant

**Batimix Mortar 682**  
Shotcrete mortar for wet process applications – Lower permeability

**Batimix Mortar 683**  
Fiber reinforced shotcrete mortar for wet process applications – Reduced shrinkage

**Batimix Mortar 684**  
Fiber shotcrete mortar for wet process applications – Minimized level of post-cracking

## Floor screeds

---

**Batimix Mortar 741**  
Ready-to-use floor screed mortar

## Resurfacing mortars

---

**Batimix Mortar 700**  
Polymer modified self-leveling underlayment / resurfacing mortar

**Batimix Mortar 740**  
Wear-resistant mortar for concrete toppings

## Epoxy mortars

---

**Batimix Epoxy Mortar 200**  
Slip and chemical resistant mortar based on epoxy resin

## Dry shakes and floor hardeners

---

**Batimix Mortar 720**  
Cementitious-based dry shake floor hardener

**Batimix Mortar 721**  
Cementitious-based, non-slip, dry shake floor hardener

## SPECIALTY CONCRETE PRODUCTS

### High strength concrete

---

**Batimix Concrete 500**  
Ready-to-use high strength concrete for repair

### Self-consolidating concrete

---

**Batimix Concrete 520**  
High performance self-consolidating concrete

### Accelerated setting concrete

---

**Batimix Concrete 540**  
Accelerated setting concrete for repair – Grade R1

**Batimix Concrete 541**  
Accelerated setting concrete for repair – Grade R2

**Batimix Concrete 542**  
Ultra-accelerated setting concrete for repair – Grade R3

### Shotcrete products with coarse & fine aggregates

---

**Batimix Concrete 560**  
Shotcrete for dry process applications – General use

**Batimix Concrete 561**

Shotcrete for dry process applications – Sulphate-resistant

**Batimix Concrete 562**

Shotcrete for dry process applications – Lower permeability

**Batimix Concrete 563**

Fiber reinforced shotcrete for dry process applications – Reduced shrinkage

**Batimix Concrete 564**

Fiber shotcrete for dry process applications – Minimized level of post-cracking

**Batimix Concrete 580**

Shotcrete for wet process applications – General use

**Batimix Concrete 581**

Shotcrete for wet process applications –Sulphate-resistant

**Batimix Concrete 582**

Shotcrete for wet process applications – Lower permeability

**Batimix Concrete 583**

Fiber reinforced shotcrete for wet process applications –Reduced shrinkage

**Batimix Concrete 584**

Fiber shotcrete for wet process applications – Minimized level of post-cracking

**Pervious concrete****Batimix Pervious Concrete 501**

Ready-to-use highly permeable pervious concrete

**Lightweight concrete****Batimix Lightweight Concrete 502**

Ready-to-use concrete having lightweight characteristics

**Architectural concrete****Batimix Concrete 505**

Ready-to-use colored concrete for architectural applications

**Additives for stamped concrete****Batimix Clear Seal 600**

Highly-efficient acrylic concrete sealer

**Batimix Stain Sealer 610**

Solvent-based acrylic concrete stain and sealer

**Batimix Color Hardener 620**

Colored dry shake surface hardener

**Batimix Color Release P-650**

Colored release (powder) agent for stamped concrete

**Batimix Release L-660**

Release (liquid) agent for stamped concrete.

**Batimix Mortar SC-670**

Single-component, cementitious resurfacing compound

**Batimix Mortar SC-690**

Two-component, thin-layer cementitious compound

**Batimix Surface Retarder 730**

Surface retarder for concrete

**ADHESIVES AND TILE GROUTS****Cementitious tile adhesives****Batimix Tile Adhesive NS-400 <sup>7</sup>**

Cementitious tile adhesive

**Batimix Tile Adhesive HS-410 <sup>7</sup>**

Cementitious tile adhesive with reduced slip

**Batimix Tile Adhesive HS-412 <sup>7</sup>**

Cementitious tile adhesive with extended open time

**Batimix Tile Adhesive HP-420 <sup>7</sup>**

Cementitious tile adhesive with reduced slip and extended open time

**Batimix Tile Adhesive F-451 <sup>7</sup>**

Fast setting cementitious tile adhesive

**Batimix Tile Adhesive F-452 <sup>7</sup>**

Fast setting cementitious tile adhesive with reduced slip

**Batimix Tile Adhesive HP-421 <sup>7</sup>**

Improved cementitious tile adhesive with additional characteristics

**Batimix Tile Adhesive WE-440 <sup>7</sup>**

Two-component improved cementitious tile adhesive with additional characteristics and reduced slip

**Batimix Tile Adhesive WE-443 <sup>7</sup>**

Improved cementitious tile adhesive with additional characteristics and extended open time

**Batimix Tile Adhesive WE-444 <sup>7</sup>**

Improved cementitious tile adhesive with reduced slip and extended open time

**Batimix Tile Adhesive F-453 <sup>7</sup>**

Improved cementitious tile adhesive with additional characteristics and fast setting

**Batimix Tile Adhesive F-450 <sup>7</sup>**

Two-component, improved fast setting cementitious tile adhesive with additional characteristics and reduced slip

<sup>7</sup> Products are available in both Grey or White colors.**Reaction resin tile adhesives****Batimix Tile Adhesive R-461**

Reaction resin tile adhesive

**Batimix Tile Adhesive R-462**

Reaction resin tile adhesive with reduced slip

**Batimix Tile Adhesive R-460**

Improved reaction resin tile adhesive with additional characteristics

## Epoxy and acrylate-based adhesives

---

### Batimix Epoxy A-300

Pure epoxy injection adhesive for rebar fixing

### Batimix A-200

Methacrylate-based resin for rebar fixing

### Batimix Epoxy 220

Epoxy adhesive for rebar fixing

## Latex-based adhesives

---

### Batimix Tile Adhesive L-430

Latex-based tile adhesive liquid admixture

### Batimix Tile Grout L-435

Polymer modified liquid admixture for tile grouting

### Batimix SBR Latex M-900

S.B.R. bonding emulsion

### Batimix Latex M-905

Versatic ester PVA bonding admixture

### Batimix Acrylic Latex M-907

Acrylic latex bonding admixture

### Batimix Patching Slurry PMS-50

Polymer modified bonding slurry

## Cementitious tile grouts

---

### Batimix Tile Grout HS-415 <sup>8</sup>

Normal setting cementitious grout

### Batimix Tile Grout HP-425 <sup>8</sup>

Improved cementitious grout with additional characteristics and reduced water absorption

### Batimix Tile Grout HP-426 <sup>8</sup>

Improved cementitious grouts with additional characteristics and strong abrasion resistance

<sup>8</sup> Products are available in different colors.

## Reaction resin tile grouts

---

### Batimix Tile Grout R-465

Improved three-component epoxy resin grout with additional characteristics

## WATERPROOFING & SEALING PRODUCTS

### Waterproofing by crystallization slurries

---

#### Batimix Mortar W-800

In depth waterproofing slurry by crystallization

### Cementitious-based waterproofer

---

#### Batimix Mortar W-810

In-depth waterproofing and protection mortar

v1.27

#### Batimix Mortar W-820 <sup>9</sup>

Efflorescence-free surface waterproofer

#### Batimix Mortar W-830 E

Two-component, waterproofing slurry with elastic properties

#### Batimix Mortar W-840 <sup>9</sup>

Fast setting waterproof plugging compound

#### Batimix Mortar W-850

Self-leveling mortar with hydrophobic properties

#### Batimix Mortar W-860 <sup>9</sup>

Non-shrink waterproof grout for filling joints smaller than 4 mm

#### Batimix Mortar W-861

Non-shrink waterproof grout for filling joints smaller than 4 mm

#### Batimix Mortar W-862

Non-shrink waterproof mortar for filling large voids

<sup>9</sup> Products with the suffix Z designate sulfate-resistant products primarily designed for the treatment of sewage facilities.

## Polyurethane sealants

---

#### Batimix PU 350

Multi-purpose elastomeric polyurethane sealant

#### Batimix PU Roof Coating 450

Single component, moisture cure polyurethane roof coating for all types of roofs

## Polysulphide sealants

---

#### Batimix Polysulphide Sealant 100

Polysulphide sealant

## Surface hardeners

---

#### Batimix Sealer L-880

Silicate based surface hardener

## Water-repellents

---

#### Batimix Water Repellent L-885

Water-repellent for facades

#### Batimix Water Repellent 158

Siloxane solvent-based water-repellent

#### Batimix Water Repellent 160

Silane/siloxane water-based water-repellent

## Surface penetrants

---

#### Batimix Sealer L-895

Linseed oil surface deck treatment

## Insulations & tapes

---

#### Batimix Tubofoam Series

Polyethylene pipe insulation

**Batimix Jointofoam Series**

Backer rod foam insulation

**Batimix Sealing Tape 530**

High performance sealing tape for movement and construction joints

**Batimix Expanding Waterstop Series**

Expanding waterstops with rain protection coating

**Batimix Joint Tape 550**

Waterproofing strip for static joints

**PAINTS, DECORATIVE & PROTECTIVE COATINGS****Interior paints****Batimix ILS-110 Gloss**

Styrene acrylic interior paint – Gloss, light shade colors

**Batimix ILS-120 Semi-Gloss**

Styrene acrylic interior paint – Semi-gloss, light shade colors

**Batimix ILS-130 Satin**

All acrylic interior paint – Satin, light shade colors

**Batimix ILS-140 Eggshell**

All acrylic interior paint – Eggshell, light shade colors

**Batimix ILS-150 Matt**

All acrylic interior paint – Matt, light shade colors

**Batimix IMS-210 Gloss**

Styrene acrylic interior paint – Gloss, medium shade colors

**Batimix IMS-220 Semi-Gloss**

Styrene Acrylic interior paint – Semi-gloss, medium shade colors

**Batimix IMS-230 Satin**

All acrylic interior paint – Satin, medium shade colors

**Batimix IMS-240 Eggshell**

All acrylic interior paint – Eggshell, medium shade colors

**Batimix IMS-250 Matt**

All acrylic interior paint – Matt, medium shade colors

**Batimix IHS-310 Gloss**

Styrene acrylic interior paint – Gloss, high shade colors

**Batimix IHS-320 Semi-Gloss**

Styrene acrylic interior paint – Semi-gloss, medium shade colors

**Batimix IHS-330 Satin**

All acrylic interior paint – Satin, medium shade colors

**Batimix IHS-340 Eggshell**

All acrylic interior paint – Eggshell, medium shade colors

**Batimix IHS-350 Matt**

All acrylic interior paint – Matt, medium shade colors

**Exterior paints****Batimix ELS-430 Satin**

Styrene acrylic exterior paint – Satin, light shade colors

**Batimix ELS-440 Eggshell**

Styrene acrylic exterior paint – Eggshell, light shade colors

**Batimix ELS-450 Matt**

Styrene acrylic exterior paint – Matt, light shade colors

**Batimix EMS-530 Satin**

Styrene acrylic exterior paint – Satin, medium shade colors

**Batimix EMS-540 Eggshell**

Styrene acrylic exterior paint – Eggshell, medium shade colors

**Batimix EMS-550 Matt**

Styrene acrylic exterior paint – Matt, medium shade colors

**Batimix EHS-630 Satin**

Styrene acrylic exterior paint – Satin, high shade colors

**Batimix EHS-640 Eggshell**

Styrene acrylic exterior paint – Eggshell, high shade colors

**Batimix EHS-650 Matt**

Styrene acrylic exterior paint – Matt, high shade colors

**Decorative coatings****Batimix M-100**

All acrylic maplexine decorative paint

**Batimix ILS-760 Roll**

All acrylic interior decorative paint – Low shade colors

**Batimix IMS-770 Roll**

All acrylic interior decorative paint – Medium shade colors

**Batimix IHS-780 Roll**

All acrylic interior decorative paint – High shade colors

**Batimix ELS-860 Roll**

All acrylic exterior decorative paint – Low shade colors

**Batimix EMS-870 Roll**

All acrylic exterior decorative paint – Medium shade colors

**Batimix EHS-880 Roll**

All acrylic exterior decorative paint – High shade colors

**Putty & paint sealers****Batimix Putty 900**

Acrylic-based putty for paint applications

**Batimix S-400**

All acrylic sealer, white color

**Batimix S-500**

All acrylic sealer, transparent

## Protective coatings

---

### Batimix Anti-Carbonation M-920

Acrylic-based anti-carbonation protective coating

### Batimix ASR Treatment 655

Penetrating sealer for alkali-silica reaction treatment

### Batimix WP-600

Styrene acrylic waterproof paint, white color

### Batimix WP-700

Styrene acrylic waterproof paint, transparent

### Batimix Epoxy Primer 150

Epoxy primer

### Batimix Epoxy Coating 160 <sup>10</sup>

Epoxy coating

### Batimix Epoxy Coating 100

Solvent-based, colorless two component epoxy resin

### Batimix Epoxy Coating 140

Two-component epoxy resin dilutable in water

### Batimix Epoxy Coating 250 <sup>10</sup>

High-resistant self-leveling epoxy floor coating

### Batimix Rebar-Protect 910

Rebar protective coating for concrete repair

### Batimix Rebar-Protect 920

Two-component epoxy-based corrosion inhibiting agent

<sup>10</sup> Products are available in different colors.

## Bituminous-coatings

---

### Batimix Bituminous Coating 500

Bituminous emulsion based coating

### Batimix Tar Epoxy 580

Tar epoxy coating

## CEMENT ADDITIVES

### Grinding aids

---

#### Batimix GA Series

Grinding aids and pack set inhibitors

#### Batimix GA-HP Series

High performance grinding aids and pack set inhibitors

#### Batimix GA-M Series

Mineral grinding aids

#### Batimix GA-RM Series

Grinding aids for cement raw meal

## Quality & strength improvers

---

### Batimix QS Series

Grinding aids and strength enhancers

### Batimix QS-HP Series

High performance grinding aids and strength enhancers

### Batimix QS-WR Series

Grinding aids, water reducers, and strength enhancers

### Batimix QS-AC Series

Grinding aids, set-accelerators, and strength enhancers

### Batimix QS-RE Series

Grinding aids, set-retarders, and strength enhancers

### Batimix QS-WPR Series

Grinding aids, water-repellents, and strength enhancers

## Masonry & mortar additives

---

### Batimix MC Series

Grinding aids for masonry and mortar cements

### Batimix MC-HP Series

High performance grinding aids for masonry and mortar cements

### Batimix MC-WR Series

Grinding aids for masonry and mortar cements, water reducers

### Batimix MC-RE Series

Grinding aids for masonry and mortar cements, setretarders

### Batimix MC-WPR Series

Grinding aids for masonry and mortar cements, water-repellents

## Specialty additives

---

### Batimix Air Series

Air entraining additives for Portland and masonry cements

### Batimix WR Series

Water reducing additives for Portland and masonry cements

### Batimix AC Series

Set-accelerating additives for Portland and masonry cements

### Batimix RE Series

Set-retarding additives for Portland and masonry cements

### Batimix WPR series

Water-repellent additives for Portland and masonry cements

### Batimix CR series

Additives for reduced level of hexavalent chromium in cement
